**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1 - 26, drawn to method of preventing Cu diffusion, classified in class 438, subclass 643.

Group II. Claims 27 - 36, drawn to diffusion barrier structure, classified in class 257, subclass 758+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of Group II as claimed can be made by another and materially different process such as depositing the barrier layers by sol-gel technique instead of vapor deposition process. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. George O. Saile on September 26, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2813

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Asok K. Sarkar whose telephone number is (703) 308-2521. The examiner can normally be reached on 8:00 AM - 5:00PM ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Bowers can be reached on (703) 308-2417.
